John E. Goodrich, D.D.S., M.P.H.
Director,
Dental Health Division

JULY, 1974

Introduction

The 1974 licensing cycle marks the first year that the Records and Statistics Division of the Iowa State Department of Health has been collecting data in conjunction with the Health Manpower Federal Cooperative Program supported by the National Center for Health Statistics.

On July 1, 1974, the Records and Statistics Division entered into a contract with the National Center for Health Statistics to provide basic data for licensed health manpower professions. Currently included in this group are Dentists, Dental Hygienists, Chiropractors, Physicians (M.D. and D.O.), Optometrists, Physical Therapists, Podiatrists, and Veterinarians. It is also planned to make use of data currently being collected by the Pharmacist's licensing board. The purpose of this program is (1) to develop and make available a wide range of health and vital data to meet the basic needs at the Federal, State, and local levels and, (2) produce data on a periodical basis for the broad assessment of the health status of the population and the planning, management, and evaluation of the delivery of health services.

Special acknowledgement is made to the following people who contributed toward the collection, processing and distribution of the data contained herein:

John E. Goodrich, D.D.S., M.Ph.
Director, Dental Health Division

James Faust, Licensing and Certification

Marzetta Burrell, Chief, Data Entry Section

Martha Baker, Programmer

Helen Kennedy, Compositor

Michael Dare, Chief, Vital Statistics Section

Hazel Shearer, Clerk

The 1974 dental surveys were mailed with the license renewal applications to 2,336 dentists who were licensed in the State of Iowa in 1973. A total of 2,165 surveys or 92.6% of those mailed were returned by June 4, 1974. Of those returned, 1,207 dentists or 55.8% reported actively practicing in Iowa. There were 766 or 35.4% of the survey respondents who are reported actively practicing outside Iowa. Of the total respondents, 23 or 01.1% are not presently employed and 169 or 7.8% are retired. The tables in the publication represent those 1,207 (approximately 96.7%) dentists actively practicing in Iowa.

For background information the appendix table summarizes the particular number and percentage of responses of those dentists actively practicing in Iowa to each question on the survey form. Preceding the appendix table is a sample questionnaire for the basic data survey.

Table 1 shows the number of dentists actively practicing in Iowa by county, age group, and type of practice.

Table 2 shows the number of dentists actively practicing in Iowa by region, county, age group, and type of practice.

Table of Contents

I. Location of Dentists	1 - 54
Table 1. Number of Dentists by State, Region, County, Age Group, and Type of Practice.	1 - 25
Table 2. Number of Dentists by State, Age Group, County, and Type of Practice	26 - 54
II. Appendix	56 - 57
Health Manpower Basic Data Survey Questionnaire	56
Appendix Table - Summary of the Responses to the Survey	57
